Our Company

Mission

The reason to be of Tulecom, with its vocation of service, is to contribute to the common good by contributing to the society and, in particular, to the area of technological services for disadvantaged groups, a permanent stimulus that helps to the development of people and to their transformation and inclusion in the community.

Vision

Our aim is being a reference company in Europe in the marketing of customized solutions, based on Ambient Intelligence (AmI), with social values that respect people's dignity and improve their life quality.

Values

- Truthful communication as to advertising and marketing.
- Efficiency and improvement in the corporate government.
- Transparency in financing.
- Honesty and loyalty in dealing with people.
- Respect, training and motivation in team management.
- Responsibility to the business environment.

Tulecom Group

Tulecom Group is company with 100% of Spanish capital, devoted to the development of tailor-made technological solutions. Our products are based on the Ambient Intelligence paradigm, supported by emergent identification, location and domotic technologies, customized to the field of healthcare, home, conferences and fairs, and mining. Our headquarters are located at **Salamanca, Spain**, with **delegations in Madrid, Toledo, and Extremadura**, as well as projects and services developed in the whole Iberian Peninsula..

**“Your loyal company,
at the service of the people”**

Tulecom has strategic alliances with important multinationals from the technological field, like Sun, Microsoft, Xmark, HP, Intermec, Dell, Verichip, Accenture, Sony, and Austco. Alike, Tulecom has the support of companies and technological institutes in Portugal, in the cities of Lisbon, Porto, and Coimbra. Further, we count on an international business network with the Spanish Institute of Exterior Trade (ICEX) as well as the support of the Spanish Public Administrations.

Since its foundation, in 2005, the Group Tulecom is in constant process of national and international expansion, with a growth of personnel of 400 %, with a human team of more than forty professionals from 10 different nationalities.

Fields Solutions Products

Fields of Use

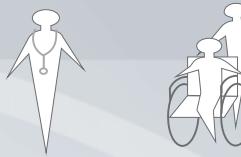

Tulecom develops solutions that are applied in various fields of use, among them:

- Healthcare
- Home
- Conferences and Fairs
- Mining

“A technology adapted to your needs”

Healthcare

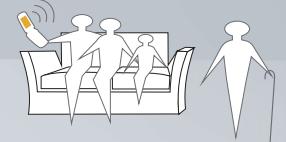

Location. Knowing how to get to another part of the hospital and where the medical staff or the equipment are can be vital in situations where time is of the essence.

Tracking. Combining domotic, access control, and tracking solutions for people and assets in real time, Tulecom has developed applications for the health sector that make the daily routine easier and increase the safety of the medical staff, the patients, and their relatives.

Home

Domotics came about to improve comfort and security and to save energy in your home and office, making your daily routine simpler and more comfortable. The absence of works distinguishes the domotic solutions offered by Tulecom.

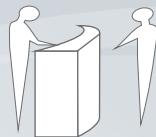

Fields of Use

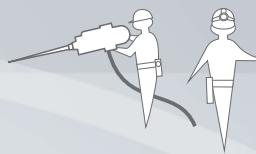

Conferences and fairs

Those attending will not have to queue up. Knowing people's movements. Knowing at anytime and anywhere who is the next speaker at a congress or how to get to the toilet without getting lost on the exhibition site. Tulecom's solutions open up many possibilities, making the work of organizing easier before, during, and after the event.

Mining

Knowing at all times the location of the personnel in a mine is essential for their safety, especially in the event of an emergency. Tulecom develops solutions for the mining sector that help it to achieve this objective.

Solutions

Tulecom offers technological solutions of information, communication, and business intelligence based on the paradigm of ambient intelligence and technological consultancy services, which are applicable to the academic, health, residential and mining sectors, and conferences, fairs and exhibitions among others.

"Technological solutions thinking on your company"

Real time Location System

Knowing the whereabouts of a speaker before his/her talk, or a mentally handicapped patient lost in a hospital, or of a defibrillator in the case of a cardiac arrest, may be crucial.

Tulecom has developed a Real Time Location System (RTLS) that locates and monitors people, assets, or resources with the use of cordless communication technologies.

Tracking

Tulecom has developed continuous tracking applications for people and assets in real time. These applications allow locating people within open or closed enclosures, locating items that need security, helping to reduce human error by the integrating and automating processes, etc.

Solutions

Information Management

Arranging personnel shifts, the use of equipments, allocating tasks or duties, monitoring inventories or cash flow...are all necessary mechanical tasks that have however no added value. Why do not replace them with computer applications?

Information Provision

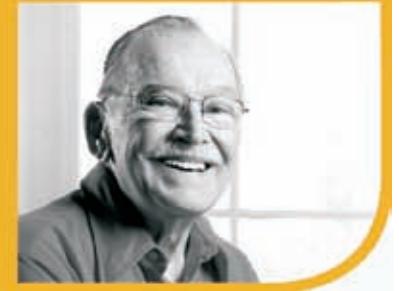

Tulecom offers providing information solutions on interactive screens, that can be personalized (TFTs, touch monitors, PDAs, laptop computers, etc.), in such a way, that each user has access to the information that he/she needs.

Personalising Services

Having the conference web site adapted to your preferences, and the lights of your home turn off automatically when you leave for work, are examples of how technology can make our lives easier.

Products
